

# QC-803 Motor Roller

JIS-C2107, Z0237

## A. DESCRIPTION

Before tape is exerted under a retentive test (or peeling test), it must be completely bonding the glue on the steel board (stainless), so as to get the most correct testing results.

This tester is motor type.

## B. SPECIFICAITON

1. Weight of roller: 2kg, surface cover with rubber:  $80^{\circ} \pm 5^{\circ}$
2. Dimension: 62×36×25(h)cm
3. Speed: 300mm/min.
4. Travel: 50~250mm, adjustable.
5. Wheel width: 47mm.
6. With roller kick stand to suspend roller to avoid deforming
7. Weight: 38 kgs.

Rubber/ Plastic Tester

Professionally Manufactures High Quality  
and Precise Material Testing Instruments.

Provide Appropriate testing solutions / Maintenance and Service  
Research and Design / Respect Requirement
